TBTC's TRS number is 811852.

The contact for this report is:

James Thoreen
GVNW Consulting, Inc.
1412 Sidney Baker
Kerrville, TX 78028
Tel: (830) 896-5200
Fax: (830) 896-5202
E-mail: jthoreen@gvnw.com

TBTC holds the license for Broadband Personal Communications Service station KNLH693. The five-year construction deadline for this license occurs on June 26, 2002.

TBTC has not constructed its system or begun offering wireless service, and has filed an application with the FCC for the transfer of the license to Qwest Wireless, LLC. (File Number 0000259838) TBTC expects that the transfer will be consummated before any system is constructed. Should the license transfer not be consummated, TBTC intends to complete construction of the system prior to the license construction deadline.

To date, TBTC has not received a Phase II requests from any PSAP.

TBTC has not determined which vendor it will use to construct its system, and, therefore, this report does not reference any schedules for installation of hardware or software, or testing of ALI.

At such time as TBTC determines it will construct the system, it will select a network infrastructure vendor, and, as part of that process consider whether it will utilize a network-based, a handset-based, or a hybrid ALI technology. TBTC hopes that during its selection process, it will identify one or more network-based or hybrid vendors that have integrated the necessary technology to provide both E911 Phase I and Phase II technologies into their products. If such a vendor is not identified, TBTC anticipates that it will utilize a handset approach.
